Pandora: Chains of Chaos is a battle-RPG set in a fantastical, Greek-inspired world. The player, an adventurer named Pandora, embarks on a journey through the land of Kome searching for her lost people. In the midst of this, Pandora realises the truth about the conflict brewing between the divinities of Kome and must find a way to repair the damage she has caused.

Pandora is led by the demigod, Eros, who is sent by the gods to watch over Pandora and assist her in making the right decisions in life. He gives her quests that help her change her attitude and moral stance, but he can be temperamental at times. Pandora must also keep her skills sharp, as she will be dealing with other enemies along her quest. We want Pandora: Chains of Chaos to be a great story, full of beautiful environments, mythical creatures, and to provide a rich user experience. We would like to invite you to join our creative journey and support us through our Kickstarter! **What's new:**

Giveaway Hakuoki: Kyoto Winds is a tactical RPG developed by Spike Chunsoft and D3 Publisher and was initially released for the Nintendo 3DS, PlayStation Vita, and Xbox 360 in 2013. A North American version is scheduled to be released on October 29, 2014. Finally, we are helping bring you more of this wonderful game and its parts of DLC namely: the DLC will be endowed with various decorative spiffy goods and standard scrap that will be unlocked gradually. One winner will be chosen at random and will be declared a winner via Facebook or Twitter. For those who missed out, he will be waiting for you in a comment below. How to claim the lucky draw? Step 1 - Sign in to your Facebook or Twitter account. Step 2 - Visit the event page. Step 3 - Take a look at the event hashtag, #HakuokiGCVDPack. Step 4 - Click the corresponding link and claim the game download voucher. Step 5 - After downloading, you can keep the access codes or a gift voucher to yourself or send it to your friend to continue the cycle! The game has been packaged in a proper box. The box contained bundle contents including the following: This time, you too can get this amazing gift pack with the metagame as well as the complete retail edition of the game! Along with all these, there are more exclusive items listed in the following: The game is anticipated to hit soon on the consoles, so let's hope that you're the lucky winner. However, there is a printing issue with a wrong name printed in some of the parts. They are as follows: 1.) 50 (50%) 2.) 30 (30%) 3.) 20 (20%) 4.) 10 (10%) Either way, do not hesitate to enter this package giveaway. Each participant can win 1-2 packs of the above four parts. So, that's 50 chances for one to win. What I was wondering is what, if any, enhancements have been applied to the console gaming side of the package in comparison to the DS game? Because the DS sold around 2.5 million units which is substantially less than the 3DS's sales of about 6 million units, Microsoft and Nintendo are more than hesitant in pumping up the DS lineup any more than it already is. A popular PC title that was ported to the 3DS (Bloodborne for the PS4)
